

# Curved Stretch Media Wall Assembly Guide

**Step 1:** Unpack all the contents of the carry bag.

**Step 2:** Assemble the frame starting with the curved 90° degree poles by matching the corresponding numbers located on each pole. Repeat for the remaining poles. The straight poles have elastic connectors for easy assembly.

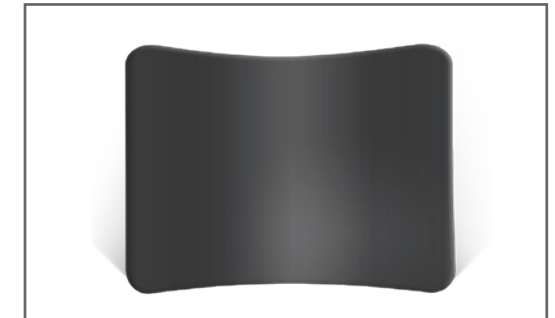

**Step 3:** Next, clip in the Vertical Brace Pole to the Bottom Horizontal bar and then feed into the Top Horizontal bar clip.

**Step 4:** Unzip the bottom of your banner and begin feeding the banner over the pole set. Start in one corner and then move onto the next corner. Tilt the frame and then evenly pull the entire banner to the bottom of the pole set.

**Step 5:** Finally, pull the banner down tightly. This step requires some assistance. So ask a friend if they can connect the zipper and begin closing the zipper, while you maintain tension on the banner.

**Step 6:** Adjust the sleeve as needed to remove any unevenness and to make sure that the edge lines of the fabric match the edge lines of the aluminium stand to avoid wrinkles on the sleeve.
