

Frameless Pull Up Banner

Assembly Guide

Step 1: Remove banner stand and pole from the supplied carry bag.

Step 2: Connect the sections of the pole securely.

Step 3: Ensure the pole is inserted entirely into the hole in the base.

Step 4: Horizontally pull the top rail of the banner for 30-40cm to pull the banner from its stand.

Please Note: If you pull the banner up straight away or pull the banner out too fast, damage could be caused to the edge of the banner.

Step 5: Carefully lift the rail into an upwards direction and pull up the rest of the banner vertically.

Please Note: Do not allow the banner to freely drop back into its stand as this may cause damage to the print.

Step 6: Twist the top rail to line up the insert sticker with the pole clip and secure the top of the banner to the top of the pole.

Please Note: When pulling up or retracting the banner, keep the banner as centred as possible to avoid damaging the edges of the print.
